

2020 Danish Society for Matrix Biology Annual Meeting

Extracellular Matrix as a Therapeutic Target

Tuesday December 8, 2020. via Zoom

1pm Plenary speaker **Veli-Matti Kähäri** (20 min talk + 10 min questions)

“Tumor microenvironment in cutaneous squamous cell carcinoma”

- 5min break

1:35 Oral speaker 1, **Kate Herum**, BRIC: “Cardiac fibroblasts adopt an osteogenic phenotype in left ventricles of mice with congestive heart failure”. (5min + 5 min questions)

1:45 Oral speaker 2, **Kristine Nørregaard**, Finsen laboratory: “uPARAP is a Novel Endocytic Receptor for Thrombospondin-1”. (5min + 5min question)

1:55 Oral speaker 3, **Krzysztof Piotrowski**, BRIC: “Investigating the role of ADAM12 in the response of cancer cells to radiotherapy using mass spectrometry-based proteomics”. (5 min + 5 min question)

2:05 Oral speaker 4, **Marie-Louise Thorseth**, Herlev Hospital: “Investigating collagen-mediated suppression of tumor-infiltrating T cells in vivo”. (5 min + 5 min question)

2:15 Oral speaker 5, **Costanza Montagna**, ISMC: “Autophagy at the crossroad between cells and matrix: implications in tendon mechanobiology”. (5 min + 5 min question)

- 5 min break

2:30 Invited speaker **Jeremy Turnbull** (20 min talk + 10 min questions)

“Cracking the GAGome Regulatory Code: Towards Next-generation Heparin Therapeutics”

- 5 min break

3:05-4:00 Poster session (3 min flash talk per poster)

4:00-4:10 Closing and awards

4:10-4:45 Annual General Meeting

Travel grant and poster awards: DSMB will award the best oral presentation from selected abstracts with a travel grant worth 2500 DKK (sponsored by Tebu-Bio). You will need to be a DSMB member to be eligible.
